Description

A 700 metre steel cable, as well as 140 adhesive rock anchors have been installed for the Endorphin via ferrata route in Galitzen Gorge. The highlight is a six metre long ladder which is extremely exposed, but, with a little bit of courage, can be negotiated without much effort. At 400 metres altitude and with an ascent lasting around 1 ½ hours, this via ferrata route offers exciting sections across rock faces and smooth rock. Difficulty level for the ascent is C, while the descent is designated A/B.

Equipment: Full via ferrata route equipment and helmet. A complete via ferrata set can be hired for a small fee at the cash desk.

The via ferrata route is reachable at the opening times from the water park Galitzenklamm.
